FAN FORCED COOKING

The element surrounding the fan delivers even heat for even cooking results. Enables different types of foods to be cooked on more than one shelf. .

GRILL + TOP ELEMENT

Heat is directed evenly on top of the food to create a fast and efficient way to grill.

DEFROST

In defrost mode, no heating elements are used. Only the fan is activated to circulate air inside the oven for defrosting and not cooking the food.

CONVENTIONAL

The top and bottom elements activate to provide a traditional style of cooking suitable for slow cooking cakes and delicate pastries.

FULL GRILL

Full grill is the perfect option for quick grilling. Toast your favourite meals or finish off the tops of your recipes at full heat.

THERMOWAVE FAN ASSISTED

This is the position where the heat is coming from the lower and upper heating elements and the heat is circulated into the oven by the fan motor and blades.
